## Projects

---

<b>ML Football Match Outcome Prediction</b>	MLFootballPred.com
• This is an undergraduate course project which I have done. Here I have used a dataset which has the football scores from 1882 to today. In this project I have predicted the home team match outcomes (Win/loss), using three classification models: Logistic Regression, Decision Tree, KNN.	
• Tools Used: Python	
<b>GhauGhau a Pet Adoption Platform</b>	GhauGhau.com
• Developed a pet adoption platform for a course project, from where you can adopt your favorite companion, live chat with AI chat bot and admin, contact with the admin, filter your preferable pets, etc. The website is also live.	
• Tools Used: NodeJS, NextJS, Tailwind CSS.	
<b>Snake Game</b>	snakegame.com
• A simple python snake game which is built using pygame.	
• Tools Used: Python	

## Skills

---
